PROFESSIONAL SUMMARY

Versatile software developer, technical quality lead, and dedicated academic tutor with a robust background in web development, database management, and programming. Known for delivering innovative, user-centric software solutions and maintaining high code-quality standards. Highly proficient in Java, SQL, and modern frameworks, with strong expertise in front-end technologies. Committed to combining technical expertise with interactive teaching to empower learners, mentor junior developers, and drive meaningful impact in technical and academic environments.

CORE COMPETENCIES & SKILLS

- **Languages & Frameworks:** Java Programming, Object-Oriented Programming (OOP), Spring Framework, ReactJS, HTML5, CSS, JavaScript.
- **Database & Architecture:** SQL & Database Management, API Integration, Web Development.
- **Quality Assurance & AI:** AI/Data Training Support, Software Testing & Debugging, Technical Documentation, Code Review, Problem Solving.
- **Leadership & Tools:** Teaching & Technical Mentoring, Collaborative team player, Project Management.

PROFESSIONAL EXPERIENCE

Center Academic Head & Technical Instructor Current

Aptech Computer Education – Onitsha, Anambra, Nigeria

- Lead the academic center by directing curriculum implementation and providing technical mentoring to students in web design, programming basics, and software engineering best practices.
- Conduct thorough code reviews and evaluate student projects to ensure adherence to industry standards, simulating real-world software testing and debugging environments.
- Develop technical documentation and lesson notes to translate complex JavaScript and database concepts into accessible, interactive learning modules.

Software Developer 06/2021 – Current

Self-employed – Anambra, Nigeria

- Architect and deploy full-stack solutions, including "AgroInvest," an agricultural investment platform, independently handling the database schema, deployment, and backend integrations.
- Develop complex backend systems, including the "gymntonic_db" fitness project, utilizing robust SQL & Database Management skills for PostgreSQL migrations.
- Developed e-commerce web-based application for shopping and a hotel website where users can book accommodations and pay online.
- Contributed to development of mobile applications, ensuring seamless functionality and user experience across devices.
- Explore and adapt to AI/Data Training platforms, aligning development outputs and problem-solving strategies with strict AI data annotation guidelines.

Product Engineering Intern Early 2026

MSDAT Project

- Produced comprehensive Product Requirements Documents (PRDs), demonstrating strong technical documentation and analytical problem-solving skills.
- Collaborated on high-impact product ideas, bridging business requirements with technical software capabilities.

Part-time Academic Tutor 04/2023 – 08/2024

St Paul University – Anambra, Nigeria

- Developed and delivered interactive learning sessions tailored to individual student requirements, fostering academic growth.
- Assessed student progress through regular tests and assignments, providing constructive feedback for improvement.
- Provided mentorship and academic counselling to students, helping them set realistic goals and plan their future education.
- Facilitated group tutoring sessions, encouraging collaborative learning and peer support among students.

EDUCATION

Advanced Diploma: Software Engineering, Java, Computer Science 2024

APTECH COMPUTER EDUCATION – Awka, Anambra

- **Duration:** 3 years | **GPA:** CREDIT

CERTIFICATIONS

- **Master of ChatGPT** – Coursiv (Certificate ID: V2XE2FGL)
  Awarded for the successful completion of the "ChatGPT" guide, reflecting over 6 hours of in-depth training and skill development. Issued 1 May 2026.
- **Certified Software Engineer**
