

JOSEPH OKECHUKWU

Versatile software developer and dedicated academic tutor with a robust background in web development, mobile applications, and programming. Known for delivering innovative, user-centric software solutions, including scalable e-commerce solutions, real-time booking systems, and enterprise-level management tools.

Proficient in Java, Python, SQL, C#, and ReactJS, with strong expertise in front-end technologies such as HTML5, CSS, and JavaScript. Skilled at collaborating with multidisciplinary teams to translate complex requirements into functional, scalable applications.

Beyond software development, I am passionate about education—mentoring aspiring developers in web design, programming, and best practices in software engineering. I bring experience in project management, ensuring timely delivery of high-quality solutions that align with client goals. Committed to combining technical expertise with interactive teaching to empower learners and drive meaningful impact in both the tech and academic communities.
